DETAILED ACTION

Terminal Disclaimer

1. The terminal disclaimer filed on 4/27/01 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent No. 5,577,186 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-11, 13-20, 22-25 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Chiang et al. (U.S. Patent No. 5,442,759).**

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. **Claims 12 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chiang et al.**

✓ Art Unit: 3713

While Chiang does not disclose expressly a wireless interface. However, such would have been obvious to one of ordinary skill in the art at the time of the invention to include a wireless network in Chiang's invention for the purpose of providing portability. Chiang discloses that her system is online, which further implies the use of a network and moreover could include a wireless network, as such is old and well known in the art.
